info@jaraware.com

We craft holistic, people-friendly digital experiences. We act as strategic partners for fast-growing tech companies in need of a scalable website with modular CMS, mobile app development, product design system, and a future-proof brand identity.

Our clients are the companies, startups and individuals who make the world go round — they educators, car ride provider, marketplaces, ecommerce platform, manufacturer, tour & trip provider, heath provider, visa agency and many more digitally. Vast and complex businesses like these need digital experiences that are just as people-friendly as they are robust and scalable.

Through challenging core assumptions, we shape the products and services that improve the lives of thousands every single day.

— We translate research into solutions, crafting thoughtful and unified brands, mobile apps, webapps, interfaces and systems.

Jaraware Infosoft was founded in 2018 in Ahmedabad, India. Today we are a remote and onsite digital agency with more than forty members working with clients around the world. As passionate designer and developers, we love building digital products that are easy to use, accessible, engaging, and delightful.

We pride ourselves on our ability to challenge core assumptions, unpick legacy behaviors, streamline complex processes, and shape the digital products and services that improve the lives of millions every single day.

We've designed products for startups that went from $0 to $12,000,00 in revenue. No matter what, we bring the same level of creativity and quality to every project and we would love to do the same for you.

40+

Researchers, strategists, designers, and developers working together to create people-friendly experiences.

200+

Digital products we’ve helped shape, optimize, and launch since 2018.

14

Countries represented in our agency, offering a valuable global perspective on our work.

Service

Application Development

We're easy to work with

100% Control of developers — You can assign developers work directly & s/he reports directly to you. Think of it as your employee working from our premises.

Monitoring their work — You will have the ability to monitor their work so you know exactly what they are doing.

Good communication skills — All of our developers speak English and communicate well.

Knowledge of project management tools — Our developers are comfortable using project management tools like JIRA, Assembla and Basecamp.

Experience working with version control software — Our developers use Github / Bitbucket for code versioning on a daily basis.

Work Time — Developers will be flexible to work on your time zone if project needs.

For our easy collaboration, we can work on custom delivery models like time and material and fixed price projects. Also, you can hire dedicated resources based on the project requirement.

You can directly share your project details with us for our review and we can provide you with a complete project understating along with the proposal.

Who work with us?

We work primarily with technology SMEs, corporations, startups and individuals who wants to develop products in the SaaS, finance, banking, property, healthcare, transport, and communication sectors.

We're proud to say our clients come to us from all around the world. We mainly work with companies from these countries:
North America - the United States, East, and West coast;
Western and Central Europe - France, UK, and Ireland, Germany, Belgium; Northern Europe - Denmark, Sweden, Norway;
Australia - Sydney, Melbourne; United Arab Emirates - Abu Dhabi, Dubai;

We like to collaborate closely with clients, and see the best results when working directly with CEOs, Heads of Marketing, CMOs, VPs of Marketing, Product or Technology and any Individuals who've long great vision.

We make especially great partners for companies who are growing fast and need a scalable web app, mobile app, design system, modular CMS and a future proof brand identity that they can manage internally as their user base grows.

Industry — we work with fintech, edtech, hospitality, health care, retail and ecommerce, real estate, transport and many more.

$10K - $30K+ — average engagement size for 1 to 3 months of work.

130 — mobile app and web apps successfully launched in the previous 3 years

Selected Clients

We've developed mobile apps to receive online order and manage inventory for them. “Annapurna Hing Pvt. Ltd.” Incepted in the year 1976 , manufacture & export quality compounded asafoetida.

We are the tech partner of the Studymock.com. We are solely responsible for its development from the scratch. Studymock is the a learning platform for competitive banking exams.

We’ve developed Koliive, The best ecommerce platform to buy or sell variety of things. The fundamental of koliive is mixture of an ecommerce and social media.

A partnership where we work closely with RSA Taxi Group provides a simple solution by connecting vehicle seekers to vehicle owners. The biggest and fastest-growing private car rental company in India.

We launched Jarawares in-house product, Webselly Providing multi-page Business website. Webselly has been developing high-quality and fast websites for corporate needs since 2020.

We've created concepts and visuals for AdityaIOT which is a platform to generate lead for businesses who provide digital security services like cams, biomatric, smart door locks etc.

We've automated linear tasks of the institute. Now Taqohm Education (Taqohm.com) is a leading online learning platform that aims to drive students' careers by providing a comprehensive range of resources and class options.

We provided a refreshed branding, website, and CMS development. G.C. Attestation focused in attestation/ legalization of documents from all the Govt. (HRD) Departments, Ministry of External Affairs for all the countries.

General Instructions:

1. The clock will be set at the server. The countdown timer at the top right corner of screen will display the remaining time available for you to complete the examination. When the timer reaches zero, the examination will end by itself. You need not terminate the examination or submit your paper.
2. The Question Palette displayed on the right side of screen will show the status of each question using one of the following symbols:

You have not visited the question yet.

You have not answered the question.

You have answered the question.

You have NOT answered the question, but have marked the question for review.

You have answered the question, but marked it for review.

The Mark For Review status for a question simply indicates that you would like to look at that question again. If a question is answered, but marked for review, then the answer will be considered for evaluation unless the status is modified by the candidate.

The Client

Taqohm Education (Taqohm.com) is a leading online learning platform that aims to drive students' careers by providing a comprehensive range of resources and class options. With a global reach, Taqohm.com enables students to access a vast repository of study materials, including PDFs, notes, papers, and videos. The platform offers students the flexibility to book personal one-to-one classes, master classes, group classes, and free demo classes. Taqohm.com focuses on university-level courses such as GCSE, IGCSE, A Level, O Level, KS3, and AS Level.

The Problem

Prior to Taqohm.com, students faced challenges in finding quality educational resources and convenient class options. Traditional classroom-based learning limited their access to personalized instruction, diverse learning opportunities, and flexible scheduling. Moreover, the lack of a centralized platform made it difficult for students to explore different subjects and find the right teachers for their learning needs.

The Solution

Taqohm revolutionizes online learning with a user-friendly platform offering various class options: one-to-one, master, group, and free demos. Students easily register, choose subjects, and book multiple sessions. The system generates Zoom meetings, records them, and provides access to upcoming classes, billing history, and profile management.

The Result

Taqohm.com has made a significant impact in the online learning landscape. By providing a centralized platform for students worldwide, Taqohm.com has empowered them to access quality educational resources and choose from a variety of class options. The platform's personalized one-to-one classes have facilitated tailored learning experiences, while master classes have expanded students' knowledge in specific subjects. Group classes have encouraged collaborative learning and provided affordable class options. Free demo classes have allowed students to explore the platform and experience the teaching style firsthand.

"It was a great experience working with Jatin and his team on a very complex edtech project with a tight deadline. I was thoroughly impressed with their technical expertise and ability to deliver the project on time."

Overview

Do you sell anything on an eCommerce platform?
Ecommerce apps have become a staple in today's digital world. Koliive is one of the best ecommerce platform to buy or sell variety of things. The fundamental of koliive is mixture of an ecommerce and social media. There are two user role of app vendor and customer. So vendor can marketing their products by uploading photos/videos in feed post as well live streaming allow vendor to go live as host and customer can join on live channel. Customer can follow/unfollow vendor and like, comment feed uploaded by vendor.

Tapping into a app features

— Customer Join live video streaming host by vendor.
— Categorized product listing with search and filter parameter.
— Return product and cancel order functionality.
— Multiple payment option to place an order.
— Interaction between vendor and customer on feed post.
— Import product list from master data for vendor.

Overview

The biggest and fastest-growing private car rental company in India is RSA Taxi Group. Customers may reserve the vehicle of their choice, choose a driver from the available options, and pick up and drop off the vehicle at various places. The best way to rent a car for all of your needs is through the RSA Taxi Group mobile app. With no hidden costs or fussy fees, RSA Taxi Group provides a simple solution by connecting vehicle seekers to vehicle owners. Since our organization has been providing services to customers for a long time, we all have extensive knowledge of our respective fields.

Tapping into a app features

— User-centric Registration process .
— Function to add requirement for all type of cars.
— SMO integration on requirement.
— Fully secured razorpay payment gateway integration.
— Fast One time password (Otp) login with firebase phone auth.
— Smooth Document varification function to make accurate requirement list.

With human-centric design at the core of our principles, we depend on the varied perspectives and life experiences of our team to help us build products for the many.

About us

Two brothers, Jatin and Rahul Parmar, founded the company in 2018, India. we were a small digital agency developing web and mobile applications.

Today, Jaraware Infosoft is a leading digital agency focused on mobile app & website development. We make things, and we're awesome at it. We love what we do and we bet on the success of each and every project we undertake.

Services and rates

Services and rates

Rate Card

You can find the list of our **average rates** for each type of service.

We have a MEF (**minimum engagement fee**) in place, which means all projects start at **$2,000**

Over the years, we've discovered this is the minimum figure that allows us to provide all our clients with a consistently high standard of work across multiple services.

Our average engagement is usually around $10,000 - $30,000 for 1 to 3 months of work. It is typically a combination of services, including visual identity, UX research, UI design, CMS/APP development.

We offer our clients several dynamic billing structures, including fixed project fees, hourly rates ($15 to $25), monthly and yearly retainers for research, design, and development services. do you want us to work on your project? feel free to write us an email.

Service	Average rate
Webapp Development	$15 - 150k
Mobile App Development	$10 - 150k
CMS (Wordpress / Webflow)	$7 - 50k
UI/UX Designing (1 month sprint)	$6 - 15k
Digital Marketing (1 month sprint)	$3 - 10k
Business Websites (Static)	$2 - 10K
Hourly	$15/hour - blended rate
