Story

— We translate research into solutions, crafting thoughtful and unified brands, mobile apps, webapps, interfaces and systems.

Story

Jaraware Infosoft was founded in 2018 in Ahmedabad, India. Today we are a remote and onsite digital agency with more than forty members working with clients around the world. As passionate designer and developers, we love building digital products that are easy to use, accessible, engaging, and delightful.

We pride ourselves on our ability to challenge core assumptions, unpick legacy behaviors, streamline complex processes, and shape the digital products and services that improve the lives of millions every single day.

We've designed products for startups that went from \$0 to \$12,000,00 in revenue. No matter what, we bring the same level of creativity and quality to every project and we would love to do the same for you.

Studymock – Test Series Platform

Studymock : A Learning Platform for Competitive Banking Exams

Studymock Become a part of India's most unique and innovative, step by step Mock Hacking Roadmap

Webapp studymock.com

Industry Edtech, Test Series Platform

Duration 3.5 Months

Tech Stack Used PHP, Laravel, MySQL

Services we provided

- UI/UX Design
- Website Development
- Admin/CMS Integration
- Exam Simulator Implementation
- Firebase OTP Integration
- RazorPay Payment Integration

Studymock is a unique modern day mock solving platform which can help you to track, analyze and maintain a score which can be super beneficial for your preparation. with the help of our innovative modern day mock hacking technique, you can upgrade and boost your scoring technique and skills to the level's best.

The Problem

Before the advent of Studymock.com, students preparing for competitive banking, insurance, and railway exams faced several challenges. The traditional methods of exam preparation lacked personalized guidance, comprehensive study material, and a simulated exam environment. Students struggled to find relevant resources, track their progress, and identify areas for improvement. The lack of an efficient platform resulted in timeconsuming and ineffective preparation methods.

To overcome these challenges, the development team at Jaraware Infosoft utilized JavaScript extensively. JavaScript was used to handle various aspects of the exam simulator, such as managing the questions counter, enabling section switching, handling timer functionality, managing question sidebar colors, and more. The team explored various JavaScript plugins and also developed custom JavaScript scripts to ensure a seamless and realistic exam simulation experience for the students.

Taqohm Education Empowering students through innovative online learning solutions

Webapp taqohm.com

Industry Edtech, Online Learning

Duration 3 Months

Tech Stack Used Android, PHP, Laravel, MySQL

Services we provided

- Branding
- UI Design
- UX Research
- Website Design
- Admin/CMS Integration
- Stripe Payment Integration
- Firebase OTP Integration
- Zoom Meeting Integration

The Client

Taqohm Education (Taqohm.com) is a leading online learning platform that aims to drive students' careers by providing a comprehensive range of resources and class options. With a global reach, Taqohm.com enables students to access a vast repository of study materials, including PDFs, notes, papers, and videos. The platform offers students the flexibility to book personal one-to-one classes, master classes, group classes, and free demo classes. Taqohm.com focuses on university-level courses such as GCSE, IGCSE, A Level, O Level, KS3, and AS Level.

The Problem

Prior to Taqohm.com, students faced challenges in finding quality educational resources and convenient class options. Traditional classroom-based learning limited their access to personalized instruction, diverse learning opportunities, and flexible scheduling. Moreover, the lack of a centralized platform made it difficult for students to explore different subjects and find the right teachers for their learning needs.

The Solution

Taqohm revolutionizes online learning with a user-friendly platform offering various class options: one-to-one, master, group, and free demos. Students easily register, choose subjects, and book multiple sessions. The system generates Zoom meetings, records them, and provides access to upcoming classes, billing history, and profile management.

AdityalOT – Lead Generation Platforms

Best security products selling and lead generation platforms for cctv & camera.

Adityaiot Providing leads for digital security businesses.

Download Google Play, adityaiot.com

Industry Internet of things (IOT)

Duration 1 Months

Tech Stack Used Android, PHP, Laravel, MySQL

Services we provided

- Branding
- UI Design
- UX Research
- Web & Mobile App Development
- CMS Integration
- Rest API Integration
- Firebase OTP Integration
- Stripe Payment Integration

The Client

"Now a day, Security has become major concern it is essential to have strong & reliable security system." AdityalOT is platform to generate lead for businesses who provide digital security services like cams, biomatric, smart door locks etc. Our client get collect the lead throught app and pass it to service provider based on their active subscription plan. There is portal also for service provider to recieve leads, renew plan, history and many more modules.

The Problem

The primary challenge faced by AdityalOT was the manual handling of service inquiries and technician assignments. Managing a large number of service inquiries and tracking users became cumbersome and time-consuming. Bhavik, the client, realized the need for an automated solution to streamline the process and improve efficiency.

The Solution

To address the problem, the Jaraware Infosoft team developed a comprehensive solution for AdityaIOT. They created a web application and a mobile app for business users to place service orders conveniently. An admin panel and a service provider web app were also developed to manage service providers, collect payments, and assign service orders. The automation of lead management, payment collection, and technician assignment helped optimize the process and improve overall productivity and saves massive amount of time.

O'positive Health - Your Comprehensive Healthcare Platform

Your gateway to informed elective surgeries and expert medical consultations

O'positive Health

Provides accessible information and streamlined processes for elective surgeries

Webapp opositivehealth.com

Industry Healthcare Tech

Duration 1 Months

Tech Stack Used PHP, Laravel, MySQL

Services we provided

- UI Design
- UX Research
- Website Design
- CMS Integration

The Client

O'Positive Health is a cutting-edge healthcare platform that provides accessible information and streamlined processes for elective surgeries. It connects patients, doctors, and hospitals, offering free consultations and comprehensive care. By partnering with government and private hospitals, O'Positive Health ensures high-quality services at an affordable cost. The platform addresses the lack of accessible information, limited consultation options, and the hassle involved in the surgery journey.

The Problem

Patients faced challenges in accessing reliable information, finding skilled doctors, and navigating the elective surgery journey. Lack of accessible information and fear led to hesitancy in undergoing surgeries. Patients struggled with finding the right doctors, managing insurance claims, and ensuring comprehensive care throughout the process.

The Solution

O'Positive Health implemented solutions to provide accessible information, offer free consultations with skilled doctors, streamline the surgery process, and assist with insurance claims. They ensured access to experienced doctors, top-tier facilities, and affordable costs, empowering patients with reliable information and reducing the surgery journey's hassle
